(see Note 4). All significant intercompany transactions and accounts have been eliminated in consolidation. The consolidated financial statements of the Company have been prepared on the accrual basis of accounting and are in conformity with accounting principles generally accepted in the United States of America and prevailing industry practice.

Functional Currency

The subsidiary's functional currency is the U.S. dollar. As a result, the financial statements of the subsidiary have been remeasured from Mexican pesos into U.S. dollars using (i) current exchange rates for monetary asset and liability accounts, (ii) historical exchange rates for nonmonetary asset and liability accounts, (iii) historical exchange rates for revenues and expenses associated with nonmonetary assets and liabilities and (iv) the weighted average exchange rate of the reporting period for all other revenues and expenses. The resulting remeasurement loss is recorded in other comprehensive (loss) income.

Current and historical exchange rates are not indicative of what future exchange rates will be and should not be construed as such.

Relevant exchange rates used in the preparation of the financial statements of the subsidiary are as follows for the nine months ended September 30, 2007 (denoted in Mexican pesos per one U.S. dollar):

	<u>2007</u>
Current exchange rate at September 30,	Ps. 10.9203
Weighted average exchange rate for the nine months ended September 30,	Ps. 10.9529

Reclassification

Certain reclassifications, which have no effect on net income (loss), have been made in the prior period financial statements to conform to the current presentation.

Cash Equivalents and Marketable Securities

The Company considers all highly-liquid investment instruments purchased with an original maturity of three months or less to be cash equivalents. The Company had \$964,329 in cash equivalents in the form of certificates of deposits at September 30, 2007 and none at December 31, 2006.

All highly liquid investments with stated maturities of greater than three months are classified as marketable securities. The Company had \$2,647,600 and \$1,632,500 in marketable securities at September 30, 2007 and December 31, 2006, respectively. These marketable securities had a cost basis of \$3,803,965 as of September 30, 2007. In accordance with Statement of Financial Accounting Standards ("SFAS") No. 130, "Reporting Comprehensive Income", we have accounted for unrealized gain (loss) as a

TARA GOLD RESOURCES CORP. AND SUBSIDIARIES
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

component of other comprehensive income. An unrealized loss of \$707,000 and \$401,000 was recorded in other comprehensive income for the nine months ended September 30, 2007 and 2006, respectively. The unrealized loss from inception, December 3, 2000 to September 30, 2007 was \$1,156,000.

As of September 30, 2007, a loss of \$209,300 was recorded on the sale of marketable securities.

Investments in Unconsolidated Entities

For investments in which the Company owns or controls from 20% to 50% of the voting shares, the equity method of accounting is used.

Earnings per Share

In February 1997, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 128 “*Earnings Per Share*” which requires the Company to present basic and diluted earnings per share for all periods presented. Basic earnings per share is computed as net income divided by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur from common shares issuable through stock options, warrants, convertible debt and other convertible securities.

At September 30, 2007, the Company had a net loss resulting in no dilution of any common stock equivalents, such as convertible debt or warrants. The following table reconciles basic earnings per share and diluted earnings per share and the related weighted average number of shares as of September 30, 2006:

	<u>For the Three Months Ended September 30, 2006</u>

Income Taxes

Income taxes are provided for using the liability method of accounting in accordance with SFAS No. 109 “*Accounting for Income Taxes*,” and clarified by FIN 48, “*Accounting for Uncertainty in Income Taxes—*an interpretation of FASB Statement No. 109.” A deferred tax asset or liability is recorded for all temporary differences between financial and tax reporting. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax basis. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effect of changes in tax laws and rates on the date of enactment.

As of January 1, 2007, the Company adopted Financial Accounting Standards Board (FASB) Interpretation No. 48, “*Accounting for Uncertainty in Income Taxes*” (FIN 48), which supplements SFAS No. 109, “*Accounting for Income Taxes*,” by defining the confidence level that a tax position must meet in order to be recognized in the financial statements. The Interpretation requires that the tax effects of a position be recognized only if it is “more-likely-than-not” to be sustained based solely on its technical merits as of the reporting date. The more-likely-than-not threshold represents a positive assertion by management that a company is entitled to the economic benefits of a tax position. If a tax position is not considered more-likely-than-not to be sustained based solely on its technical merits, no benefits of the tax position are to be recognized. Moreover, the more-likely-than-not threshold must continue to be met in each reporting period to support continued recognition of a benefit. With the adoption of FIN 48, companies are required to adjust their financial statements to reflect only those tax positions that are more-likely-than-not to be sustained. Any necessary adjustment would be recorded directly to retained earnings and reported as a change in accounting principle.

New Accounting Pronouncements

In March 2008, the Financial Accounting Standards Board (“FASB”) issued FASB Statement No 161, “*Disclosures about Derivative Instruments and Hedging Activities*”, an amendment of SFAS No. 133 (“SFAS 161”). SFAS 161 applies to all derivative instruments and nonderivative instruments that are designated and qualify as hedging instruments pursuant to paragraphs 37 and 42 of SFAS 133 and related hedged items accounted for under SFAS 133. SFAS 161 requires entities to provide greater transparency through additional disclosures about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under SFAS 133 and its related interpretations, and how derivative instruments and related hedged items affect an entity’s financial position, results of operations, and cash flows. SFAS 161 is effective as of the beginning of an entity’s first fiscal year that begins after November 15, 2008. We do not expect that the adoption of SFAS 161 will have a material impact on our financial condition or results of operations.

In May 2008, the FASB issued SFAS No. 162, “*The Hierarchy of Generally Accepted Accounting Principles*” (“SFAS 162”). SFAS 162 is intended to improve financial reporting by identifying a consistent framework, or hierarchy, for selecting accounting principles to be used in preparing financial statements that are presented in conformity with GAAP for nongovernmental entities. SFAS 162 is effective 60 days following the SEC’s approval of the Public Company Accounting Oversight Board amendments to AU Section 411, “The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles.” We do not expect the adoption of this statement to have a material impact on our financial condition or results of operations.

Note 2. Stockholder’s Equity

The fair value of each option award is estimated on the date of grant using the Black-Scholes option valuation model that uses the assumptions noted in the following table. Expected volatilities are based on volatilities from the Company's traded common stock. The expected term of options granted is estimated at half of the contractual term as noted in the individual option agreements and represents the period of time that options granted are expected to be outstanding. The risk-free rate for the periods within the contractual life of the option is based on the U.S. Treasury bond rate in effect at the time of grant for bonds with maturity dates at the estimated term of the options.

Note 3. Income Taxes

The income tax benefit components are as follows. This amount differs from the amount of income tax determined by the applying the U.S. federal tax rates of 35% to pretax income from continuing operations for the period ended September 30, 2007 due to the following:

	U.S. Companies	Mexican Companies	Total
Cumulative Net Loss, December 31, 2006 (inclusive of gain on discontinued operations)	\$ (370,000)	\$ (1,451,000)	\$ (1,821,000)

The components of the Company's deferred tax asset (liability) as of September 30, 2007 are as follows:

	U.S. Companies	Mexican Companies	Total

Net deferred tax liability	<u>\$ (194,000)</u>	<u>\$ -</u>	<u>\$ (194,000)</u>

Net operating losses (“NOL”) generated in Mexico may only be used to offset income generated in Mexico. As disclosed above, the Company generated NOLs in Mexico for our Amermin and La Esuarda subsidiaries of approximately \$3,403,000 with an estimated tax benefit of \$952,700. Per SFAS No. 109, “*Accounting for Income Tax*” and FASB Interpretation No. 48, “*Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No.109*”, when it is more likely than not that a tax asset cannot be realized through future income the Company must allow for this future tax benefit. We have fully allowed for the entire deferred tax asset relating to our Mexican subsidiary at September 30, 2007.

Our Tara Mineral and American Metal Mining subsidiaries are reporting entities to the taxing authorities separate from this consolidation and have been excluded from the deferred tax analysis above.

TARA GOLD RESOURCES CORP. AND SUBSIDIARIES
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

As of September 30, 2007 we have generated net income before taxes from our U.S. operations of approximately \$429,750. Due to defaults by potential mining concession partners, we estimate that we will use our historical NOLs by December 31, 2007 and increase our existing deferred tax liability. Due to this we have maintained our deferred tax liability of \$194,000 as of September 30, 2007.

Upon adoption of FIN 48 as of January 1, 2007, the Company believes that it had no gross unrecognized tax benefits that, if recognized, would favorably affect the effective income tax rate in future periods. At September 30, 2007 the amount of gross unrecognized tax benefits before valuation allowances and the amount that would favorably affect the effective income tax rate in future periods after valuation allowances were \$0. These amounts consider the guidance in FIN 48-1, "Definition of Settlement in FASB Interpretation No. 48". The Company has not accrued any additional interest or penalties as a result of the adoption of FIN 48.

The Company files income tax returns in the United States federal jurisdiction, certain states in the United States and certain foreign jurisdictions. The Company has recently filed its US federal return for the year ended December 31, 2005. Tax years 2005 through 2007 remain open; 2006 has been drafted and is awaiting finalization and filing. We have filed our Mexico tax return through December 31, 2006. The Company has no pending income tax audits in any jurisdiction that it files income tax returns.

Note 4. Mining Concessions

Changes that occurred as of September 30, 2007 to our mining concessions are disclosed below. Information about our mining concessions should be read in conjunction with the Company's Annual Report on Form 10-KSB for the year ended December 31, 2006.

- a. On May 12, 2005, the Company executed a contract to purchase the rights to 12 concessions, known as "San Miguel".

The acquisition price of the mining concession was \$700,000. An extension payment and an option to purchase payment totaling \$22,000 was also capitalized making the effective price of the property grouping \$722,000.

Pursuant to the terms of an August 2005 agreement, Paramount Gold Mining Corp. was given the right to acquire 70% interest in the San Miguel prospect by:

- Paying Tara Gold \$250,000;
- Paying \$150,000 directly to the former owner of the property;
- Issuing 718,519 shares of its common stock to Tara Gold; and
- Spending \$2.5 million on a trenching, drilling and sampling program on the property.

On March 16, 2007, Paramount notified the Company that it had spent the required \$2.5 million of exploration development expenses to earn a 70% interest in the joint

TARA GOLD RESOURCES CORP. AND SUBSIDIARIES
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

venture. These expenses were reviewed by Company management and agreed to with the exception that Paramount was required to spend an additional \$160,000 to reach the required \$2,500,000 of exploration expenses. The final payment of 400,000 shares valued at \$1,216,000 was received in the second quarter of 2007 at which time the Company transferred a 70% interest in the concession to Paramount. We have recorded a gain on the sale of joint venture interest of \$1,216,000 related to this transaction.

As of September 30, 2007 the San Miguel joint venture ownership was 70% Paramount, 30% the Company. Although both the Company and Paramount maintain joint control over the joint venture, the Company's ownership percentage decreased to an amount that is more in line with an equity investment and not consolidation. Accordingly, the joint venture has been deconsolidated from the Company financial statements and the equity method has been applied to account for the Company's investment in the San Miguel joint venture.

Under the equity method, the Company's percentage interest in the net assets and results of operations of the San Miguel joint venture are presented as a single line on the balance sheet unless the value in the investment account is zero due to continued losses from the investment. At September 30, 2007, the Company's investment in the San Miguel joint venture on its balance sheet was \$0. Due to the deconsolidation, the Company recognized a loss of \$195,000. The Company invested another \$1,263,181 in cash in the joint venture as of September 30, 2007 and included non-cash expenses of \$216,600 included in exploration expenses.

The remaining payments due to Paramount with respect to this concession at September 30, 2007 are as follows:

2007	\$	30,000
2008		30,000
	<u>\$</u>	<u>60,000</u>

In December 2007, the remaining \$60,000 due to Paramount was waived.

- b. On May 12, 2005, the Company executed a contract to purchase rights to four concessions, known as "La Currita".

The acquisition price of the concessions was \$1,200,000 plus value-added tax of \$180,000. As of April 2007 the acquisition price and the related value added tax had been paid in full. As of June 30, 2008, we are in the process of finalizing title transfer to the Company which we anticipate completing in the third quarter of 2008.

In April 2006, the Company, through its Mexican subsidiary Amermin, entered into a joint venture agreement with Raven Gold Corp. ("Raven") with respect to the La

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

Currita Groupings (“La Currita joint venture”). The agreement was ratified in August 2006, and amended in March 30, 2007.

Under the original agreement, Raven was to pay cash and issue shares of its common stock to the Company to purchase a 25% interest in the joint venture. Raven was also required to provide a \$500,000 loan for start-up costs. Raven made the following payments:

- Second quarter 2006: \$125,000 for joint venture interest;
- Third quarter 2006: \$50,000 for joint venture interest;
- Fourth quarter 2006: \$425,000 for joint venture interest; \$500,000 loan for start up operations;
- First quarter 2007: \$200,000 for joint venture interest; and,
- Second quarter 2007: \$50,000 for joint venture interest.

On May 3, 2007, the Company entered into a new agreement with Raven pertaining to the La Currita joint venture. The May 3, 2007 agreement provided that the payments received pursuant to the prior agreements, as well as the \$500,000 loan for start up costs, were forfeited or forgiven. Since the Company was not required to refund any amounts to Raven, the Company recognized the \$850,000 received under the prior agreements as Gain on Dissolution of Joint Ventures and recognized a \$500,000 Gain on Extinguishment of Debt as of September 30, 2007.

In accordance with the terms of the new joint venture agreement, Raven acquired a 25% interest in the La Currita prospect by paying \$600,000, and delivering 500,000 shares of its restricted common stock valued at \$530,000, to the Company in the second quarter of 2007. As such, we have recorded a gain on the sale of joint venture interest of \$830,000 and \$300,000 in minority interest in association with this property.

To earn a 40% interest in the La Currita concession under the new agreement Raven must:

- Deliver 500,000 restricted shares of Raven, to Tara, on or before June 10, 2007;
- Spend \$1,375,000 on the exploration and development of the La Currita concessions on or before May 30, 2008;
- Provide Tara an audited statement of expenditure of the \$1,375,000; and,
- Provide Tara 90 days to review the final audit statement of expenditure.

TARA GOLD RESOURCES CORP. AND SUBSIDIARIES
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

To earn a 60% interest in the La Currita concession of under the new agreement Raven must:

- Deliver 500,000 restricted shares of Raven, to Tara, at notification to increase its interest to 60%;
- Spend an additional \$2,875,000 on the exploration and development of the La Currita concessions on or before November 30, 2009;
- Provide Tara an audited statement of expenditure of the \$2,875,000; and,
- Provide Tara 90 days to review the final audit statement of expenditure.

During the second quarter of 2007, Raven notified the Company of its intent to increase its percentage to 40% and delivered an additional 500,000 common shares, valued at \$530,000, to the Company. As of June 30, 2008 Raven has not earned its 40% interest and had defaulted on its obligations required by the joint venture agreement. The Company is working with management of Raven to cure the default.

- c. On March 23, 2006, the Company executed a contract to purchase the rights to four concessions, known as the “Lluvia de Oro”. On January 2, 2007, the agreement was modified to adjust the payment schedule for the property. The Company took possession of the property as of June 30, 2006 and has made all necessary payments through June 30, 2008.

The acquisition price for the mining concession was \$4,000,000 plus value-added tax of \$600,000. Payments remain as follows:

2007	\$ 632,500
2008	2,472,500
	<u>\$ 3,105,000</u>

As of September 30, 2007, we have imputed interest of \$105,971 remaining on the note, resulting in total asset capitalization of \$3,903,996 and note amount of \$3,009,026. As of June 30, 2008, all required payments in 2008 have been made.

On April 4, 2006 the Company signed an agreement, as amended on September 12, 2006, with Columbia Metals Corporation Limited providing Columbia the right to acquire a 100% interest in the Lluvia de Oro prospect by:

- paying \$550,000 to the Company;
- paying all remaining property payments;
- issuing 1,000,000 shares of its common stock to the Company;
- reserving a 20% net cash flow interest in favor of the Company.

TARA GOLD RESOURCES CORP. AND SUBSIDIARIES
NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

The net cash flow interest entitles the Company to 20% of the revenue from the operation of the property, less all expenses associated with maintaining and operating the property. Although the Company is not required to pay any of these expenses, if Columbia decides to explore for more reserves the Company will be required to pay 20% of the exploration expenses.

Until Columbia has made all payments in accordance with the agreement and earned their full right to the property or they trigger default in which we can record all funds as Other Income, we will record the funds received as part of the "Payments received from joint venture partners for options to purchase interests in mining properties" on our balance sheet. Upon successfully completing the term of the agreement we will then recognize a gain or loss on the sale of the mining concessions.

As of June 30, 2008 Columbia had made all required payments.

- d. On March 27, 2006, the Company executed a contract to purchase the rights to 23 concessions, known as "Las Minitas". In April 2007, the agreement was renegotiated, based on a geological study, to reduce the purchase price of the mining concessions and restructure the debt payments.

The amended acquisition price for the mining concessions is \$2,750,000 plus value-added tax of \$412,500. Payments remain as follows:

2008	\$ 482,500
2009	632,500
2010	920,000
2011	<u>862,500</u>
	<u>\$ 2,897,500</u>

In addition to the \$2,750,000 above, we have capitalized \$173,913 in payments made toward the original agreement. In the new agreement this payment was not applicable to the remaining debt stream. We have included it with the asset capitalization as part of the effective purchase price of the mining concession.

As of September 30, 2007, we have imputed interest of \$265,060 remaining on the note, resulting in total asset capitalization of \$2,658,854 and total note amount of \$2,632,441. As of June 30, 2008, all required payments in 2008 have been made.

Effective January 2008, the agreement was amended to extend the payment date to 2012 and reduce the amount of the note to \$2,150,000 plus value added-tax of \$322,500.

- Half of the payments above can be made in shares at a 20% discount to market.
- Make all remaining property payments.
- Spend a certain amount on the development of the property.
- Issue to the Company 750,000 shares of common stock, 500,000 of which was due upon execution of the Agreement, 250,000 is due by June 9, 2008.

The Company received the \$180,000, \$190,000 and \$200,000 toward the property payments and all payments due to the Company as scheduled until September 2007. At that time Pershimco defaulted on the agreement by missing the subsequent payments. On March 14, 2008, a settlement agreement was executed between the parties resulting in the termination of the November 12, 2007 agreement, the Company retaining all payments made by Pershimco; the transfer of all mineral claims to the Company; the surrender of all geological data (including drill cores) to the Company; all permanent fixtures and infrastructure becoming the property of the Company. Once Pershimco has satisfied the terms of the Settlement Agreement, Pershimco shall receive a 1% Net Smelter Return from the sale of any ore mined from the property with a provision which allows the Company to purchase the 1% Net Smelter Return for \$500,000 at any time.

Subsequent to Lateegra not making their required payments under the agreement, the Company Lateegra and La Camera Mining, Inc. reached a settlement agreement which enabled La Camera Mining, Inc. to enter into a joint venture agreement on this property. See Note 8 below.

Note 5. La Millionaria Joint Venture

In October 2006, the Company signed a non-binding letter of intent with Gold and Silver Minerals Corp. (“GSMC”) providing GSMC the option to acquire a 25% interest in the La Millionaria property (“La Millionaria joint venture”).

Under the original agreement, GSMC was to pay cash and provide their common shares to purchase a 25% interest in the joint venture. GSMC made the following payments:

- Third quarter 2006: \$55,000; and
- First quarter 2007: \$50,000.

The Company’s agreement with GSMC was cancelled on June 29, 2007. Since the cancellation agreement did not require the Company to return the cash payments or shares to GSMC, the Company recognized the payments of \$105,000, as well as the value of the 1,000,000 shares (\$370,000), received from GSMC as Gain on Dissolution of Joint Ventures (\$475,000).

As of June 30, 2007 GSMC did not have an ownership percentage in the La Millionaria joint venture.

This mining concession has been included in the La Camera Mining, Inc. joint venture agreement, see Note 8.

As of July 31, 2007 the minority interest for Tara Minerals represents approximately \$216,000 of the minority interest in our statement of operations.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND PLAN OF OPERATION

In March 2002, Tara Gold's discontinued its software development business and was inactive until early 2004 when it began acquiring and developing oil and gas properties. In 2005, Tara Gold sold its oil and gas properties after it determined that these properties were not economical.

In April 2005, Tara Gold began acquiring mining properties. As of June 30, 2008, Tara Gold had an interest in twelve mining properties in Mexico, including three properties owned by Tara Minerals, a subsidiary of Tara Gold.

During the nine months ended September 30, 2007 the Company sold ore which was stockpiled at its Pichaco mine and processed ore from its La Currita mine. During the nine months ended September 30, 2007 Tara Gold had revenues of \$380,000.

During the nine months ended September 30, 2006, Tara Gold was relatively inactive, having discontinued its oil and gas operations in early 2005 and was entering the mining industry. Consequently, the Company had no revenues, and general and administrative expenses for this period were less than those in the nine months ended September 30, 2007.

During the nine months ended September 30, 2007, Tara Gold was actively involved in conducting exploration work on its mining properties. As a result, Tara Gold's expenses during the nine months ended September 30, 2007 were significantly higher than those during the nine months ended September 30, 2006.

During the nine months ended September 30, 2007 Tara Gold recorded a gain of \$500,000 on the extinguishment of debt, a gain of \$1,325,000 on the dissolution of two joint ventures and a gain on the sale of joint venture options of \$2,046,000 . See Note 4 and Note 5 to the financial statements filed as part of this report for further information.

During the nine months ended September 30, 2007, Tara Gold's operations used \$2,787,000 in cash. During this same period Tara Gold invested \$174,000 in mining properties and equipment, purchased an office building and land for \$395,000, repaid loans and advances of \$4,499,000, and made payments of \$290,000 toward the purchase price of mining properties. Tara Gold satisfied its cash requirements for the period primarily through:

- sale of the securities of unrelated third parties
- sale of its common stock
- payments from joint venture partners

Tara Gold did not have any off balance sheet arrangements as of September 30, 2006 or 2007.

Tara Gold anticipates that its capital requirements for the twelve months ending September 30, 2009 will be:

Payments for mining properties	\$ 4,178,000
Mining exploration and development	1,500,000
General and administrative expenses	<u>700,000</u>
Total	<u>\$ 6,378,000</u>

The capital requirements shown above do not include any capital required by Tara Minerals, Tara Gold's subsidiary.

Tara Gold does not have any commitments or arrangements from any person to provide Tara Gold with any additional capital. If additional financing is not available when needed, Tara Gold may continue to operate in its present mode or it may need to cease operations.
